Customization

Shin Dorn offers custom design of self-adhesive anti-slip safety products for client's branding. Excellent anti-slip performance ensures user satisfaction.

Custom colors, shapes, sizes and packaging available.

Thermal Sensitive Safety Stickers

Tap water scald injuries are especially likely to occur in children and elder people. Thermal sensitive stickers contain temperature-sensing material that turns into different color as the temperature sensed goes higher than 100 degree Fahrenheit.

Ideal for use in bathtubs, washbasins and any places where warning sign of water temperature is needed.

Anti-slip Tapes

Widely used in slippery areas such as stairs, ramps, door entrance, restroom and kitchen floors. Excellent anti-slip performance provides extra friction and prevents fall accidents.

Waterproof and durable, ideal for use in household, office and all public places.

Tactile Warnings of Danger

Tactile warnings of danger are required on packaging of toxic products. Shin Dorn manufactures tactile warning labels in accordance with ISO11683 International Standard and helps client comply with relevant regulations.

The adhesive adopted in Shin Dorn's anti-slip safety products complies with EU standards: PAHs and REACH Regulation for 6 Phthalates (6P) and NP.

Shin Dorn has established a complete quality management system and holds ISO9001-2008 Quality Management as well as ISO14001:2004 Environmental Management System accreditation.
